

MEMBRANE REFURBISHMENT FOR MIDDLE NORTH AND SOUTH HIGH SCHOOLS GYM STRUCTURES

100' X 210' Titan Series 4 Structures, 21,000 square feet each,
42,000 square feet total

Background

In the mid-2000's, Middletown School District purchased two identical structures for use as gymnasiums at the district's two high schools. They quickly realized that these structures filled all of their needs and provided all the benefits of the "permanent" structures they thought they needed. Unfortunately, when it came time to refurbish the exterior membranes, the company from whom they purchased the structures went out of business. They needed a company that had expertise in providing membrane refurbishment services for any structure, regardless of OEM.

Solution

Signature was a natural partner for the project. Inspecting, maintaining, repairing and refurbishing fabric structures of all shapes and sizes regardless of original manufacturer is our core business. We had refurbished countless structures from the company that manufactured these buildings and were quite familiar with them. Plus, we had provided previous services for these two structures and the District trusted Signature to the job right.

Details

Our approach included a system consisting large membrane panels that covered the existing membrane roof and walls in full. with a new tensioning system and architectural grade Ferrari membrane. The system was designed to minimize interior work allowing all hanging systems to remain in place. Signature was able to perform BOTH full refurbishments over a single summer while school was out.

**At Signature, our clients are our partners.
Their success is ours.**

**In addition to Middletown School District, Satisfied
Signature Client Partners Include:**

- The New England Patriots
- The Philadelphia Eagles
