

NEWARK SCHOOLS TEMPORARY GYMNASIUM

Case Study

Background

In the fall of 2021, Signature received a call from the Newark School District. The roof of the gymnasium at University High School had been badly damaged and they had nowhere to hold physical education classes. They needed a temporary gym and they needed it fast- failure to fulfill the phys ed requirement could delay graduation for seniors. Now, this is NOT Signature's core business, however given our experience and contacts throughout the industry, we knew we could help.

Solution

Signature teamed with a structure rental company to provide a turn key solution- a 118' x 98' aluminum framed structure installed in a parking lot behind the school, equipped with a complete HVAC System with two full size basketball courts and recreation areas. It was installed in less than two weeks in January of 2022 and will be dismantled by Signature in April of 2023.

Details

No one missed graduation and the district is ecstatic. Core business or not, it's a project we were proud to be part of and is another example of Signature's ability to provide a wide range of tension fabric structure solutions.

**At Signature, our clients are our partners.
Their success is ours.**
